

# Home Learning Menu w/c 27.04.20

If your child would like an additional maths or literacy challenge this week, try the challenges on this sheet!

## Literacy Challenge

Imagine you came into school and there were no teachers. Your friends decided that you are in charge of the school for the day.

Talk with an adult about what rules you might have at your school.

Think of at least 3 new rules for the school if you were in charge. Say those rules aloud and then write them down.

Remember to re-read your sentences to make sure they make sense.

Post your rules onto tapestry so we can see.

## Maths Challenge

Noah saw 12 legs walk by into the Ark.

How many creatures could he have seen?

How many different answers can you find?

Visit the weblink below for additional information.

<https://nrich.maths.org/136/note>

### Key questions

What creatures could there be?

How many legs do they each have?

What's the greatest number of creatures he could have seen?

What's the smallest number of creatures he could have seen?
