If your child would like an additional maths or literacy challenge this week, try the challenges on this sheet!

Literacy Challenge

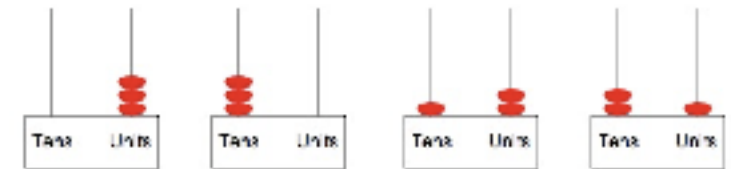

Imagine you are Jack, at the beginning of the story, and Mum has told you to sell the cow. Can you make a poster to advertise your cow for sale?

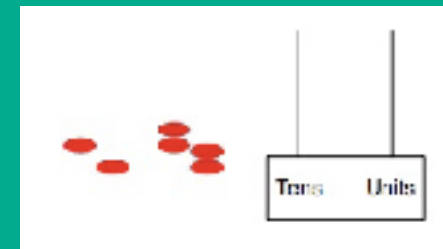

Include a drawing of the cow and write about why you think people should buy her.

Maths Challenge

If you put three beads onto a tens/units abacus, you could make the numbers 3, 30, 12 or 21.

Explore the numbers you could make with six beads.

Top tip: use beads, marbles or even grapes to make your numbers.
